

# ZENworks Service Desk New End-user Portal Reference

October 2018

The information in this guide pertains to the new end-user portal. This guide provides an overview of the tasks that an end-user can perform in this new end-user portal.

- ♦ [Section 1, "Overview," on page 1](#)
- ♦ [Section 2, "Store," on page 1](#)
- ♦ [Section 3, "Reporting an Incident," on page 2](#)
- ♦ [Section 4, "My Profile," on page 3](#)
- ♦ [Section 5, "Requests," on page 3](#)
- ♦ [Section 6, "Legal Notices," on page 5](#)

## 1 Overview

The new end-user portal enhances the overall user experience. Using this new end-user portal, customer can perform Store, Request and Incident tasks that they were performing in the existing customer portal.

The new end-user portal can be accessed through any devices such as desktops, mobiles, tablets using the following URL:

[https://<zenworks\\_service\\_desk\\_server>/servicedesk/](https://<zenworks_service_desk_server>/servicedesk/)

## 2 Store

The Store page enables you to view store items that are assigned to customers which include Requested and Not Requested, based on the administrator settings. Customers can create a request on the available store items.

- ♦ [Section 2.1, "Requesting a Store Item," on page 1](#)
- ♦ [Section 2.2, "Searching the Store Item," on page 2](#)
- ♦ [Section 2.3, "Filtering the Store Items," on page 2](#)

### 2.1 Requesting a Store Item

To request a store item, click a store item and specify the following information, and then click Request.

1. **Request Description:** Specify a description to define the request.
2. **Additional Details:**
  - a. **Line Manager:** This field is an auto-populated field. User cannot edit this field.
  - b. **Location:** Specify the location from where this request is created.

c. **Preferred Contact Type:** Select the preferred contact type. This field includes Phone and Email.

- ♦ **Email:** If you select Email as the Preferred Contact Type, then specify email address in the adjacent field.
- ♦ **Phone:** If you select Phone as the Preferred Contact Type, then specify contact details and Preferred Contact Time in the respective fields.

3. **Attachment:** If you want to provide any attachments with this request, you can either drag and drop the attachment or click the Attachment field, and then upload the required fields.

Any number of attachments can be added to a request, but each file should not exceed 100 MB in size.

---

**NOTE:** The Additional Details section can be enabled or disabled in [Setup > Privileges > Customers > Show Additional Information](#).

---

## 2.2 Searching the Store Item

To search a store item:

- ♦ In the search bar, located in the banner, specify the keyword and click the search icon.

## 2.3 Filtering the Store Items:

To search required Store Item, you can use the either the filter or search option provided in the portal.

In the left hand side of the store page perform the following actions to filter the Store Item:

1. Select the required store item, whether its Requested, Not Requested or Both.
2. In the Categorization section, select the categorization to which the store item belongs.  
This field is populated based on Categorization available in [Store Setup > Store Categorization](#).
3. In the Item Type section, select or search for the type of the store item.  
This field is populated based on types available in [Configuration > Types](#).
4. After specifying all the fields, click [Apply](#).

---

**NOTE:** Filter can be applied on the searched store items.

---

# 3 Reporting an Incident

Customer can report an incident from any page.

To report an incident, perform the following:

1. Click the Report an Incident button.

---

**IMPORTANT:** This button is enabled only when Administrator has selected [Create](#) or [Create And Edit](#) in the Incidents, Change Request or Service Request fields.

---

2. In the [Subject](#) field, specify the subject for this incident.

By default, the Incident field is disabled. To enable this field, click [Setup > Privileges > Customer > Show Subject Field](#).

3. Specify a description for the incident.

4. Select the Item Category.

After selecting Item Category, following fields are displayed:

- ♦ Item Type
- ♦ Item

5. Specify the following Additional Details:

- ♦ **Location:** Specify the location from where this request is created.
- ♦ **Preferred Contact Type:** Select the preferred contact type. This field includes Phone and Email.
  - ♦ **Email:** If you select Email as the Preferred Contact Type, then specify email address in the adjacent field.
  - ♦ **Phone:** If you select Phone as the Preferred Contact Type, then specify contact details and Preferred Contact Time in the respective fields.

6. **Attachment:** If you want to provide any attachments with this request, you can either drag and drop the attachment or click the **Attachment** field, and then upload the required fields.

Any number of attachments can be added to a request, but each file should not exceed 100 MB in size.

---

**NOTE:** The Additional Details section can be enabled or disabled in **Setup > Privileges > Customers > Show Additional Information**.

---

## 4 My Profile

As a customer, you can view and update your account information in the My Profile page.

1. In the top right-hand corner of the New End-user Portal, click your login name, and then click **My Profile**.
2. In this page, you can update details such as **Email** and **Password**.

---

**NOTE:** If the system is synchronized with an authentication server, user cannot modify any information in the My Profile page.

---

## 5 Requests

The Requests page displays all the requests. In the request page, you can perform following actions:

- ♦ [Section 5.1, “Viewing Request Details,” on page 4](#)

- ♦ **Description:** Description that was specified while creating the request. Click more to view the complete description.
- ♦ **Notes:** Notes added for this request. Multiple notes can be added for a request. To add more notes, see [Add Note](#).

## 5.2 Actions on a Request

Some of the actions that can be performed on a Request are as follows:

### Add Note

To add a note for a request:

1. Click the hamburg menu, and select [Add Note](#).
2. In the **CC** field, specify an email ID to whom you want to notify. This field auto suggests email IDs based on the specified characters.
3. In the description, specify a description.
4. specify the required fields and then click [Add Note](#). If required, you can add an attachment in the Attachment field.

---

**NOTE**

1. All the notes on a request are stacked, and the latest note is displayed on top of the list.
  2. After collapsing the request, all the attachments in a request can be downloaded by clicking the attachment icon.
- 

**Resolve a Request**

To resolve a request:

1. Click the hamburger menu, and click **Resolve**.
2. In the **CC** field, specify an email ID to whom you want to notify.
3. In the description, specify a description.
4. Click **Resolve**.

## 5.3 Searching Requests

To search a request:

- ♦ In the search bar, located in the banner, specify the keyword and click the search icon.

## 5.4 Sorting Requests

Requests can be sorted based on various fields and can be sorted in ascending or descending order. The sort operation can be performed on the searched results as well.

To sort requests:

- ♦ On the right-top of the request page, click the **Sort By** drop down, and select required field.

The available options are **Recent**, **Request**, **Request Type**, **Item**, **Created On**, and **Status**.

---

**NOTE:** To sort request ascending or descending, click the adjutants to the Sort By field.

---
