

ZENworks 11 SP2

Test Scenarios for *Create/Delete Local Products*

This document contains test scenarios for ZENworks 11 SP2 Beta 1.

Purpose of the Test Scenarios

The purpose of these exercises is to familiarize you with some of the new features included in *Create/Delete Local Products (CDLP)*.

Assumptions

We assume that you have followed the instructions for installing ZENworks 11 SP2 by using the *ZENworks 11 SP2 Installation Guide* (<http://www.novell.com/documentation/beta/zenworks112>).

Test Scenarios

There are two beta test scenarios in this document:

1. Providing Create/Delete Local Products (CDLP) Rights
2. Verifying Create/Delete Local Products (CDLP) Rights for Existing Lower Privilege Zone Administrators

Test Scenario #1: Providing Create/Delete Local Products (CDLP) Rights

Objective:

To provide the Create\Delete Local Products (CDLP) Rights as a super administrator to new and existing users in the Management Zone.

Steps:

A super administrator has the access to provide the Create\Delete Local Products (CDLP) Rights to Zone Administrators with lower privilege access.

1. Log in to ZENworks Control Center as a super administrator.
2. Click *Configuration*.
3. Click on an existing user or create a new user and then click on the user.
4. Click *Rights > Add*, then select *Zone Rights*.
5. Allow *Create\Delete Local Products*, then click *OK*.
6. Click *Apply*.

Expected Results:

- ❑ Super administrators will be able to add, merge, edit, and delete the local products.
- ❑ Users who have been given CDLP rights will be able to add, merge, edit, and delete the local products.
- ❑ Users who have not been given CDLP rights will not be able to add, merge, edit, and delete the local products.

Test Scenario #2: Verifying Create/Delete Local Products (CDLP) Rights for Existing Lower Privilege Zone Administrators

Objective:

To verify Create/Delete Local Products (CDLP) Rights for Existing Lower Privilege Zone Administrators

Steps:

Existing lower privileged zone administrators will not get CDLP rights by default.

1. Log in to ZENworks Control Center as a super administrator.
2. Click *Configuration*.
3. Click on an existing zone administrator.
4. Click *Rights > Edit*, then select *Zone Rights*.

Expected Results:

- ❑ Existing zone administrators with lower privilege rights would be denied the Create/Delete Local Products rights.

Note: Applies only if the existing zone administrator has not already been given the CDLP rights described in [Test Scenario #1](#).
