

# ZENworks 11 SP2

## Test Scenario for Asset Inventory - Administrator-Defined Fields

This document contains a test scenario for ZENworks 11 SP2 Beta 1.

### Purpose of the Test Scenario

The purpose of these exercises is to familiarize you with a new feature included in Asset Inventory.

### Assumptions

We assume that you have followed the instructions for installing ZENworks 11 SP2 by using the *ZENworks 11 SP2 Installation Guide* (<http://www.novell.com/documentation/beta/zenworks112>).

### Objective:

To use Administrator-Defined Fields (ADF) in the Asset Inventory page for creating dynamic device groups and for searching devices in the Device and Inventory page.

### Steps:

Administrator-Defined Fields created in the Asset Inventory page can be used for creating dynamic device groups based on the ADF values. These ADFs can then be used to search for devices in the Device and Inventory page.

#### Part 1

To create saved searches using ADF:

1. Log into ZENworks Control Center.
2. In the *Configuration* page, click *Asset Inventory*.
3. In the Administrator-Defined Fields, select Workstation.
4. Follow the steps mentioned in the wizard to create the ADF.
5. Go to the *Devices* page.
6. In the search tab, select *Advanced Search*.
7. In the Saved Searches, click *Add* and then click *Add Filter*.

#### Part 2

To search for devices in the Asset Inventory page:

1. In the *Configuration* page, click *Asset Inventory*.
2. Go to the *Devices* Search and then click *Add Filter*.

#### Part 3

To use ADFs in creating Dynamic Workstation Groups or Dynamic Server Groups:

1. Go to the *Devices* page and select either Workstation or Server.
2. Click *New > Dynamic Workstation Group* or *Dynamic Server Group*.
3. Provide a group name and then click *Next*.
4. Click on *Add Filter*.

***Expected Results:***

- ❑ You should find ADFs available in the Devices page.
- ❑ You should be able to use ADFs for creating Dynamic Workstation Groups.
- ❑ You should be able to use ADFs for creating Dynamic Server Groups.
- ❑ You should be able to use ADFs for searching devices in the Asset Inventory page.
