AdminStudio 6 ZENworks Edition Installation Guide

AdminStudio

Published September 2004

Abstract

This Installation Guide lists the System Requirements for AdminStudio 6 ZENworks Edition and explains the installation procedure.

Table of Contents

Introduction

Congratulations on choosing AdminStudio, the premier solution for preparing reliable, manageable applications and patches for enterprise use. Using AdminStudio to standardize the way you package, test, distribute, and manage your applications ensures higher quality software deployments that save you time and lower TCO.

System Requirements

The recommended system configuration for AdminStudio 6 ZENworks Edition is:

Item	Requirements
Processor	Pentium® III- class PC (500 MHz or higher recommended)
RAM	256 MB or greater (512 MB preferred)
Hard Disk	1.1 gigabytes
Display	Designed for XGA at 1024 x 768 resolution or higher
Operating System	Microsoft Windows NT 4.0 (Intel) with Service Pack 6 installed, Windows 2000, Windows XP, or Windows Server. Predeployment Test and SMS Web Console require Microsoft IIS 5 or later.
Browser	Microsoft Internet Explorer 5.01 or higher required (IE 5.5+ is recommended)
Privileges	Administrative privileges on the system
Mouse	Microsoft IntelliMouse or other compatible pointing device

Installation Procedure

Launch the AdminStudio installation and the InstallShield Wizard will guide you through the installation process. All components of this edition will be installed.

AdminStudio Components

The following AdminStudio components are included with AdminStudio ZENworks Edition:

Icon	Component
	Repackager: Repackaging Legacy Setups Repackage and convert legacy setups into Windows Installer packages.
	Tuner: Customizing Packages Build Windows Installer transforms for changing features, adding files, or making other modifications.
	Distribution Wizard: Preparing Packages for Distribution Get your packages ready for distribution through ZENworks.

These additional AdminStudio components are included with AdminStudio Professional Edition:

Icon	Component
	InstallShield Editor: Authoring and Enhancing Packages Customize Windows installer packages directly, or author new packages.
	Application Isolation Wizard: Isolating Applications Reduce versioning conflicts by modifying an application so it always loads the versions of components—such as DLLs—with which it was originally developed and tested.
	Quality Monitor: Ensuring Package Quality Test a Windows Installer–based application in the targeted deployment environment to ensure the application works as expected.
	OS Snapshot Wizard: Capture Your Operating System Scan your computer's operating system and record the files, INI files, shortcuts, and registry entries present.
	ConflictSolver: Identifying and Resolving Application Conflicts Identify and eliminate software conflicts before deployment.
	Predeployment Test: Analyzing Installations Prior to Deployment Determine if a Windows Installer .msi package will succeed or fail when it is installed in production.
	Patch Impact Manager: Analyzing the Impact of Installing Microsoft Patches Review Windows OS and Microsoft application patches and test the impact they will have on your environment before they are deployed.

Macrovision Support
